

# ENADE SVERIGE

## FRÅN DIKTATUR TILL DIREKTDEMOKRATI

### Our core agenda:

- "Introduce official responsibility and restore impeachment."  
"No to the EU, NATO, the UN, WHO. Sweden shall write its own laws and stand on its own feet. We shall be able to cooperate with any other country we please without external pressure or intervention. No to global think tanks like the Bilderberg Group, World Economic Forum, and similar - elected politicians are prohibited from participating in these forums."
- "YES to a Sweden that is independent and as self-sufficient as possible, regarding all sectors from organic farming to high-tech industry. We want our local communities to shape their own municipalities via a direct democratic model much like they do in Switzerland. For example, 'Brussels or Stockholm should not dictate whether a small municipality should build a new swimming pool, school, or similar. It should be up to the municipality's residents to decide. However, no municipality can circumvent the law. Swedish law should apply equally to all citizens. No group should be favored or otherwise given advantages and special treatment."
- "Our party United Sweden will therefore advocate for strong central control regarding our nationwide core issues, including critical functions of society. For example, we want to nationalize the banking, energy, and telecommunications sectors, which are much like the nervous system of all countries. These should not be privatized."
- "Actively work for Sweden to have good diplomatic relations with ALL other countries. Sweden should start by improving relations with the countries we have the worst relations with due to the agendas of previous governments and the media."
- "Build state-owned collective housing for the homeless who have fallen through the cracks. These will provide residents with a chance to get back on their feet and have a meaningful life with decent conditions. There should be a program to curb addiction, daily activities such as various crafts, vegetable gardening, berry and mushroom picking, fishing, and keeping chickens for eggs. All of these can be sold through the farm shop, and any profit will be distributed fairly among the residents."
- "We want to ban Swedish arms exports."
- "We want to protect children from HBTQI propaganda, work to stop the sexualization of children, and stop the normalization of pedophilia as well as all forms of religious coercion."
